Wed, **November 2, 2016** (#CN02616)

**WSDOT Monroe Maintenance Pit Site in
Monroe Washington**

Thur, **November 3, 2016** (#CN02617)

14200 Cascade View Dr., Monroe, WA 98272
Ph. *

(*There is no phone available at this site*)

Cost: \$150

Time: 8:00am to 4:00 pm

Class Size: 36

Instructor

Nathan Hardebeck of Clean Water Technologies will present this field training that will provide attendees with hands on experience placing and using field BMPs to meet environmental requirements during routine maintenance work.

Target Audience

Local agency road maintenance supervisors, crew leads and crew members; the course content is valuable for anyone involved with construction, maintenance and/or soil disturbance activities.

Course Description

Training is focused on teaching the principles of erosion and sediment control and how to best apply these principles to existing site conditions. Class participants are taught how to select, install, inspect and when to remove BMP(s) under a variety of different conditions. Many of the BMPs will be tested with water (provided by a water truck) to simulate, as closely as possible, actual conditions that would be encountered in the field. This class meets the requirements as described in the Regional Road Maintenance ESA Program Guidelines for Track 3F training.

Registration

Please register online using this link: [LTAP Training On-line Registration Form](#). Fill in the requested information, select your class from the list, and press "Submit." You will receive an email from LTAPTraining@wsdot.wa.gov when we process your request. If you do not receive this email message within a day or two, you may not be registered and should contact us by phone.

Confirmation letters are emailed prior to the class. If you are unable to attend, someone else from your agency may attend in your place. Invoices for the registration fee will be emailed after the class.
